

Seeder Console

Compatible with
ZYNX
 Control (ASC*) & Variable Rate!

Seeder Console

The EAGLE E15, built on over 15 years of seed rate controller development, offers the latest technology with the same ease of use, finger tip control and reliability farmers have come to expect from KEE Technologies.

The EAGLE E15 Seeder Console has the ability to control or monitor four(4) different products, and a number of different drive systems including electric motor, actuators, hydraulic drives, liquid control and NH3 gas control. The master on/off switch allows the user to select cabin or optional tillage switch kit for machine lifting or lowering.

The development of the EAGLE E15 has been totally driven by input and suggestions from farmers around the world. With totally selectable drives, multiple product calibration and audio and visual alarms the EAGLE E15 is a world leader in seeding consoles.

The one screen display allows the following to be viewed at a glance:

- area hour
- total area
- zone area
- speed
- fan speed
- fan pressure
- product bin contents

As a stand alone controller, Eagle has amazing capabilities that offer the farmer and OEM everything that they have ever wanted along with ease of installation and operations.

The EAGLE E15 can be configured as a Monitor only, as a Controller, or with the ZYNXLINK option as a full Variable Rate Controller given unmatched flexibility and upgradeability.

A main feature of the EAGLE E15 Seed Controller is its compatibility with KEE Technologies' ZYNX. The EAGLE E15 can plug directly into ZYNX and with the ZYNXLINKS software installed can function as the ZYNX's seed rate Electronic Control Unit (ECU).

ZYNX adds the next dimension to farming operations with Precision Agriculture options such as Guidance, Auto Section Control and PRO STEER.

As a stand alone monitor or controller the EAGLE E15 Seed Rate Controller is standard equipment fitted by many Seeder Manufacturers (OEMs) and can be programmed and customised to most manufacturers individual requirements.

Also available from KEE Technologies in the EAGLE range is the EAGLE E15 Spray Controller and the EAGLE E15 Horticulture Controller.

EAGLE is a Monitor and Controller capable of world leading performance

Seeder Console

Features

- Controls or Monitors up to 4 products tanks or bins
- Controls Electric Motors, Actuators, Hydraulic Drives, Liquid control and NH3 gas. (requires Multi-Drive Electronic Control Unit (MDECU))
- ZYNX Upgrade Compatible: Auto Section Control and Variable Rate Control
- One screen display: Area Hour, Total Area, Zone Area, Speed, Fan Speed, Fan Pressure, and Product Bin contents.
- Master ON/OFF select cabin or optional tillage switch kit (machine lifting or lowering).
- Multiple product calibration
- Totally selectable drives
- Actuator position
- Product density
- Back lit keys
- Easy to install, set-up and operate
- Motor range and amperage
- Audio and visual alarms
- Positive tank ON/OFF switches (Controller only)
