Advanced Seeding Systems

Simplicity X-bar

Unit shown - 9 metre dual row *X-bar* with Lift assist and *Strikers* on 333mm spacing

- Unique clamping system allowing for unrestricted layouts and easy unit movement. **NO U-BOLTS.**
- Single or Dual row units available. Lift assist is standard on Dual row.
- Comes in Linkage and Trailing bar formats.
- 6, 8, 10 and 12 metre planting widths.

Features - *Simplicity Striker* Patent No 769937

- Walking Beam action means the *Striker* has excellent ground following ability and depth control.
- Easy and accurate planting depth height adjustment.
- Straight caulter at the front to cut a groove for minimal soil disturbance.
- Easy press wheel changeover for different options to suit your conditions or moisture level (single and twin press wheel).
- Easy point changeover with a Simplicity Inverted T point or Keech moisture seeking points.
- Hydraulically controlled down pressure providing a constant down pressure at any point of travel.
- Easily interchangeable option of running a Shank or Twin disc opening unit.
